

OUTDOOR FLAGPOLES

FIBERGLASS EXTERNAL HALYARD SERIES

Our fiberglass flagpoles are manufactured to duplicate the classic Greek Entasis taper design. All poles have an ultra-hard, gel coat finish that stands up to the harshest of weather conditions. Our rugged gel coat finish is especially well suited near salt water or in other extreme weather conditions - our poles will not corrode, pit or rust. Since fiberglass is a non-conductor, no grounding is required; thus installation is easy and inexpensive. Our standard flagpoles have either a Brilliant White or Dark Bronze pre-cast gel coat finish. Other colors are available upon request; please contact us for a prompt quotation. **Our innovative molding process produces a flagpole shaft with a tensile strength of 50,000 pounds per square inch.** Inside a steel clam shell mold, seven layers of reinforced fiberglass roving, mixed with a polyester resin is aligned in a vertical plane for maximum strength and placed on a thick layer of gel-coat. An inflatable bladder is layed the entire length of the mold. The mold is closed, the bladder inflated and the resulting pole is created by subtle pressure and slow curing during an exothermic chemical reaction.

STANDARD ACCESSORIES

- Gold anodized aluminum ball ornament
- Stationary truck on FGR poles, Revolving truck on FG poles
- Solid braided polypropylene halyard
- Swivel flag snaps with vinyl covers on all models except FGR15, FGR20 & FGR25 which are supplied with nylon snaps
- A cast aluminum cleat with mounting screws is supplied on all models except the FGR15 which is supplied with a cast nylon cleat
- A fiberglass flash collar is supplied on all models except the FGR15, FGR20 & FGR25; a flash collar is available for the poles as an option
- Fiberglass foundation sleeve

MODEL	EXPOSED HEIGHT	OVERALL LENGTH	BUTT DIA.	TOP DIA.	WALL	REC. FLAG SIZE	UNFLAGGED MAX. WIND	SHIPPING WEIGHT
